

AureLisa in 6 Diagrams

Follow hyperlinks below. | [Click here to ask Lisa anything.](#)

- [See White Paper](#)

- [About Jean-Luc Mommaerts](#)

AURELIS

= unique philosophy of [rationality & depth](#)

+ congruent products & services:

- 1300+ [AurelisOnLine](#) sessions
- 15 [books](#) , 12 [Lisa Files](#)
- 2200+ [blogs](#) & [Wiki-Lisa](#)
- ...

LISA

= Video [Coach-bot](#)

See: [Lisa pitches Lisa in 3'](#)

Supporting people
one-on-one
from the inside out
in chronic pain, burnout
& many more domains

Total Person

= New wave, first time ever:

- Truly holistic
- Truly [scientific](#)
- Truly [Compassionate](#)

BRIGHT FUTURE

(from challenging present)

LISA from now

Lisa

Public Benefit for-profit

See [Lisa Presentation \(ppsx\)](#)

Doable → Now is the time.
Scalable → domains, languages
Provable → science +++ !

Example projects + venues

- Chronic pain relief → homes for elderly care
- Burnout → B2B projects
- Opioid addiction relief → US cities
- Preventing heart infarctions → Social Insurance Comp.
- Quit Smoking support → Governmental projects

Development from POC → MVP
(chronic pain, burnout):

XX €

Proof of Concept

June 2024

- Dialogue → blog-wiki
- Coaching POC
- Face/voice, no memory

MVP

in one year

Further embedding

Academia, business, ...

Planetarianism

Philanthropy

= 9 realistic Lisa-projects
See [Presentation \(ppsx\)](#)

Example projects + venues

- Chronic pain project in Brazilian favelas → USA-ID
- Opening body-mind science for physicians & lay people based on Lisa dialoguing → Patient Support Groups

Forever: 15% of revenue to sustain philanthropy

Philanthropic funding sought for roll-out of these together in 'light version':

XX €

LISA from MVP

Additional projects

Low-hanging fruits with high go-to-public potential:

- DailyTwinkles
- Deep Minds...

=

Starting points Coach-Lisa

+

Community building
From Planetarianism

—

Physical AURELIS-center
(for workshops,
meditations, long-time
staying...)

—

R&D department (Belgium?)

—

Publications: scientific and
broad public, articles and
books

—

Technological

See LISA Technological
Schema

+

Specific developments:

- AurelisOnLine (guided meditations) individualization & integration
- G.I.M.O. add-ons
- Ontology formation
- Memory
- Specific developments for specific projects & campaigns (quit smoking, chronic pain, ASCIMO modules for science +++)
- Endless possibilities, based on Lisa Files, e.g. burnout)

Roll-out

- **B2Academia:** VUB, Stanford, Yale, UCSD... through personal contacts (JLM)
- **B2B:** business deals through proper marketing & sales efforts
- **B2C:** through additional project (see left side), with focus on high-yield, low-cost influencers
- **B2D**istricts: e.g. huge opioid addiction problems in many US cities

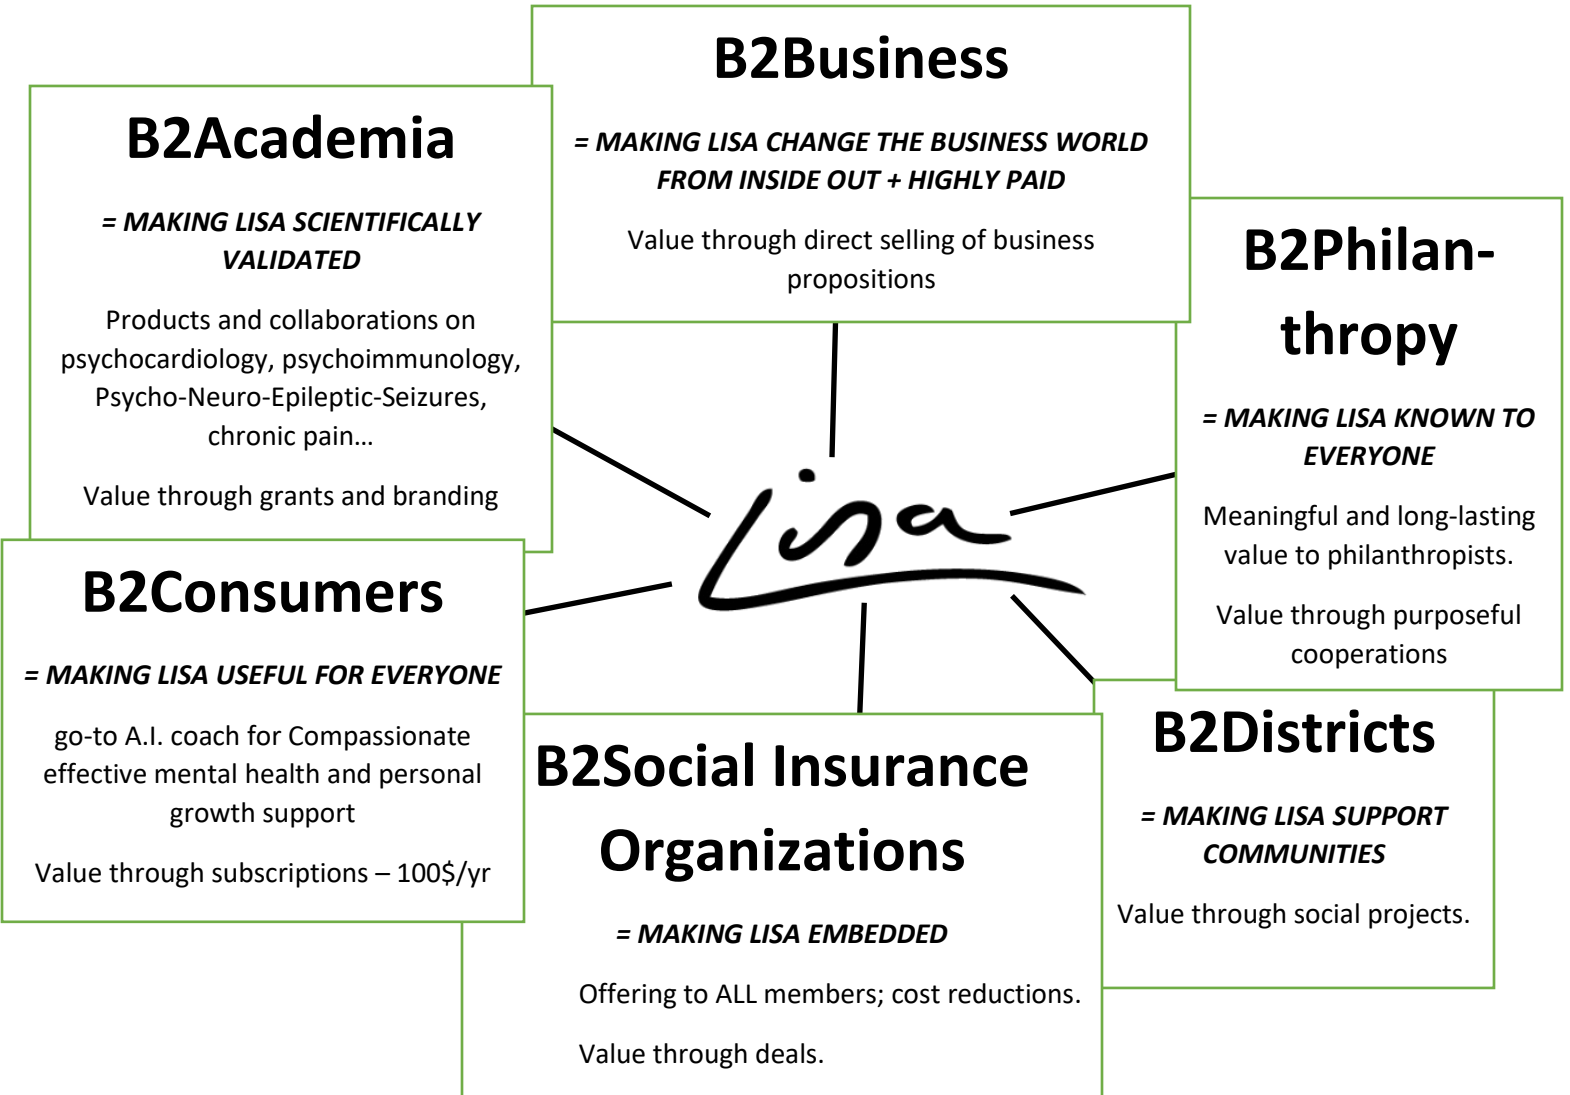

Juridical advise + testing!

Crucial in everything: the right branding efforts

The user experience (thus the product itself) starts with the first contacts!

Where is the Value?

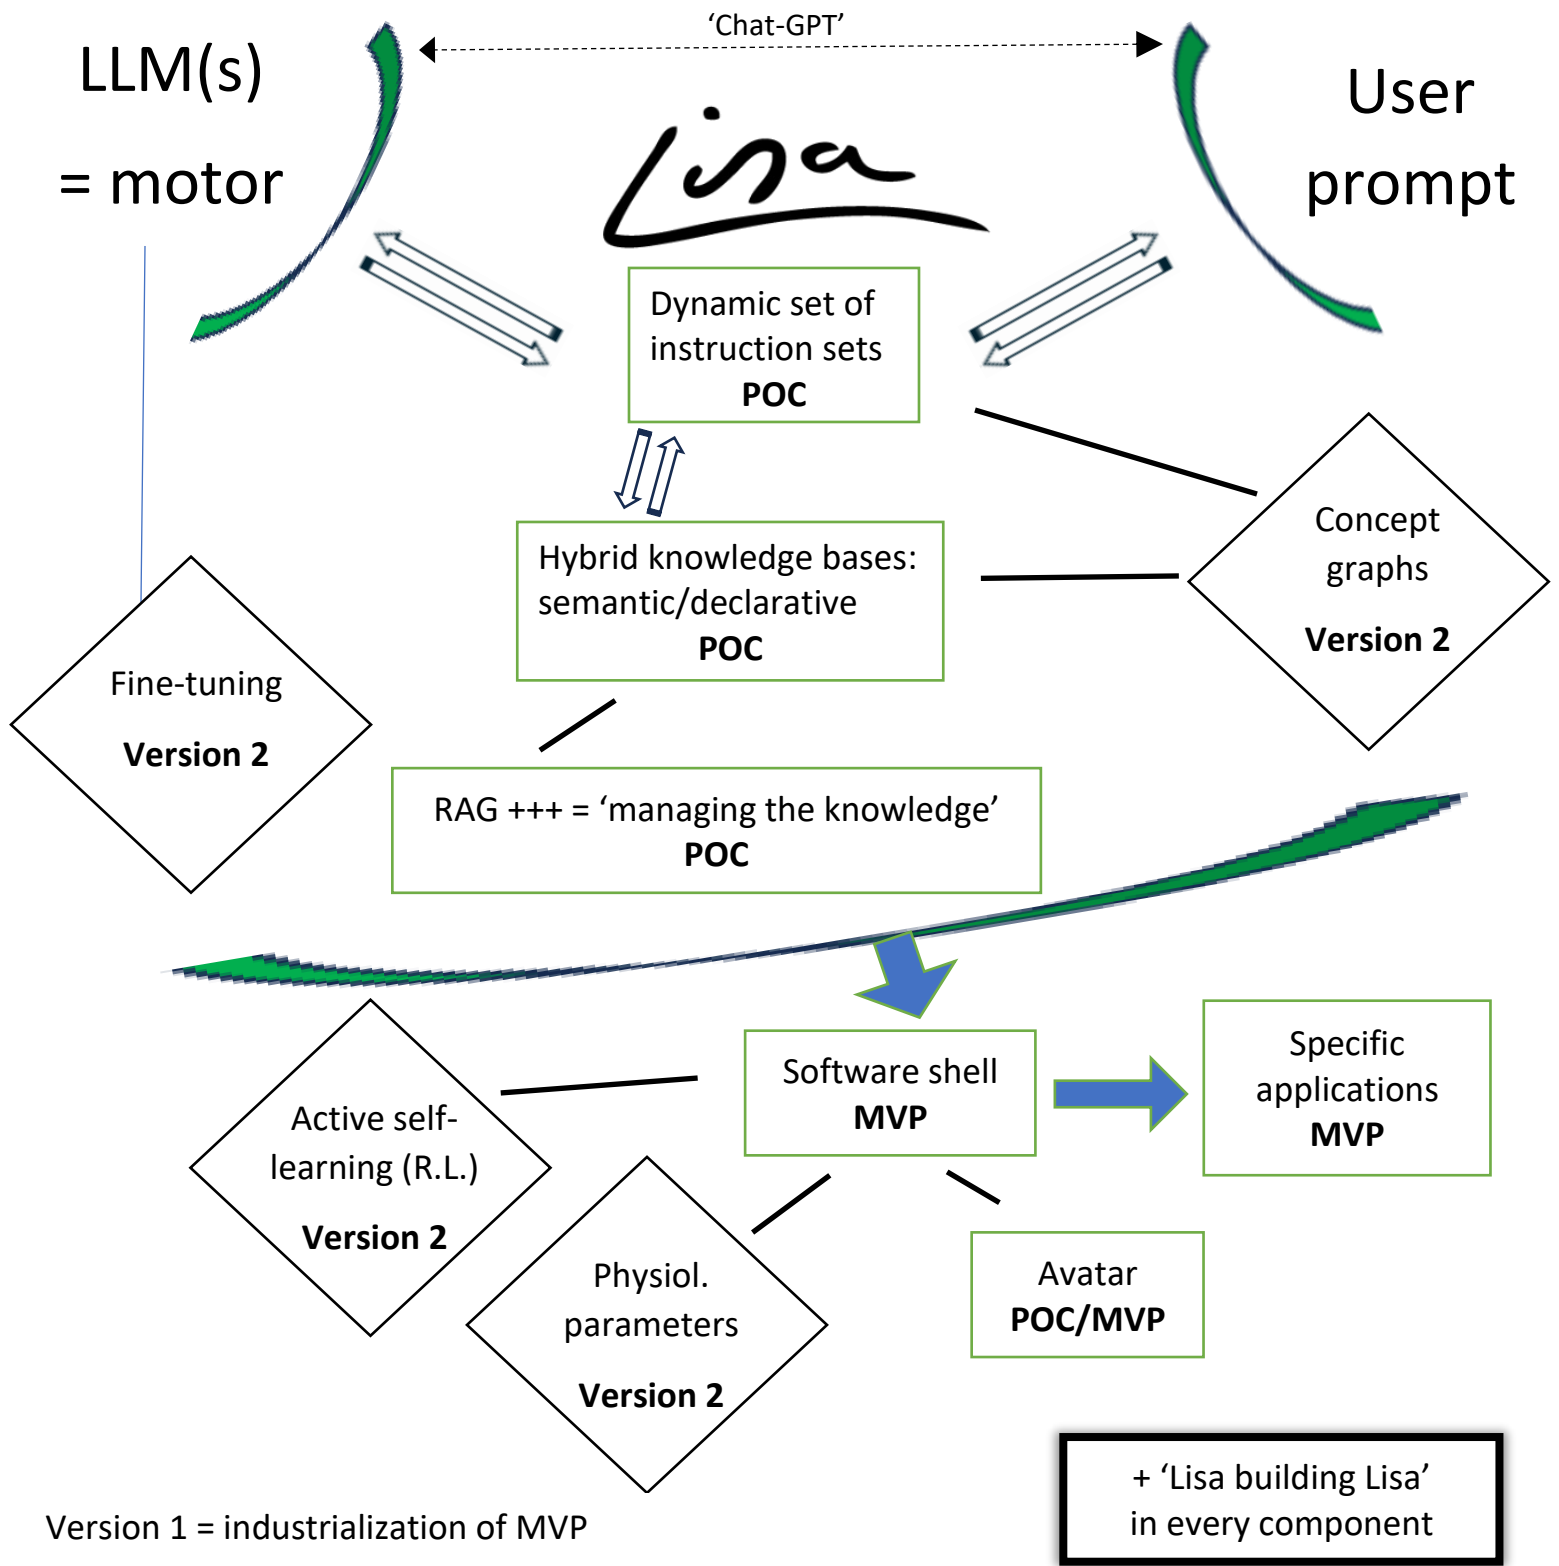

= money/value to get more things done

OTHER ELEMENTS OF VALUE

- Multilingual / multicultural
- Potential for strong branding
- Game changing / being the first
- Lisa making Lisa → continual development and durability ++
- Many products already developed

LISA Technological Schema

Version 1 = industrialization of MVP

Version 2 and beyond: MANY possibilities

Proprietary developments: all except LLMs and physiol. parameters (pulse, BP, facials, pupils, ...)

Toward Super-Intelligent A.I.

See [TED-Talk \(pdf\)](#)

Non-Compassionate

Compassionate
(e.g. Lisa)

With us soon enough
to take it seriously

We will NOT control it
for long.
(hubris to think so)

autonomy
(volition, consciousness,...)

We bring Compassion
into it WHILE reaching
true A.I.
(not much time left)

= unavoidable

We will be
controlled.

Nobody/nothing
will get controlled,
except
'Compassionately.'

It will not bring
Compassion to us.

It will help us to
become better
humans.

Dystopia

Killer robots, killer humans, ...

Eu-topia

A future together in
worldwide Compassion

See book: [The Journey towards Compassionate A.I.](#)
